The Great Barrier Reef
is a r... of 500
million...
The Great Reef 196-8000
years old.
The reef was discovered
by James Cook when it
was first spotted in the area.
The reefs are on the
continental shelf
of the Australian
continent.
As the sea level rose
to rise the coral
was...
mountains -
which are now
completely
submerged.

at the time we do protect
